COPY**REILLY TAR & CHEMICAL CORPORATION****Mr. E. L. Finch - St. Louis Park****Laboratory - Indianapolis****R. J. Hennessy****October 26, 1970****St. Louis Park Plant - Sewer Installation.**

For your information I am sending you one print of each of the following drawings:

701210-1	Layout of Sewer
701210-2	Flow Diagram
701210-3	Foundations for Separator
701210-4	Pole Barn
701210-5	Separator Piping
701210-6	Frames for Pulling Pumps from Sump
701210-7	Cone Bottom Tanks

The drawings are as complete as we can make them without approval of your request to connect to the St. Louis Park sanitary sewer. It may be possible to use the old sewer from the treating room and boiler if there is not too much ground water in it during heavy rains. Otherwise two sewers will be needed, one for process water and the other for ground water. Your comments on this will be appreciated.

These drawings are for your information. We will need to do some field work to complete them if your request to connect to the city sewer is approved as presented.

Very truly yours,

R. J. Hennessy
